

June 28, 2007

Washington, DC – Today, Congressman Jerry McNerney (CA-11) announced that \$500,000 for water treatment

“Providing clean drinking water for our citizens is one of the most basic, and necessary, functions of government.

“It’s funding like this that helps us improve the quality of drinking water for our citizens, without affecting

“Manteca has made great strides in increasing the amount of drinking water available, and we will continue

The funding will be used to retrofit existing wells in Manteca to ensure the city's water quality meets with

Funding for the project is subject to approval by the Senate and then President Bush. The appropriation
